#LearningSavesLives Webinar Series

Igniting knowledge networks to keep people safe in emergencies

Celebrating UN Spanish Language Day and its importance in bringing life-saving knowledge to the frontline in the Americas and the rest of the Spanish-speaking world during health emergencies

Date: Friday 23rd April 2021
Time: 3:00 p.m. to 4:30 p.m. Washington time
English-Spanish translation available

Register now

In the second year of the COVID-19 pandemic, real-time training has become the mainstay of the COVID-19 response. On April 23, to mark the International Spanish Language Day, the Pan American Health Organization and the World Health Organization will co-host a webinar on how virtual training has helped defend public health and protect lives in the Americas. The webinar will be in Spanish with English interpretation and will focus on how PAHO's Virtual Campus and OpenWHO.org's global platforms have rapidly expanded training and made life-saving knowledge available in the languages of the Americas. Join experts and professionals from across the region and around the world to discover how they innovated to bring knowledge and skills to the frontline.

Moderator
Gabriel Listovsky
CVSP-PAHO Regional Coordinator
Human Resources for Health Unit
Health Systems and Services Department

The OpenWHO.org team recently commemorated the first anniversary of the publication of its first COVID-19 course. Since then, we have made 29 COVID-19 courses available in multiple languages, 10 of them in Spanish.

While these have had a strong uptake during the pandemic, with over 5 million registrations on the OpenWHO platform, we know that many more Spanish speakers could benefit from OpenWHO courses' knowledge. START NOW!

OpenWHO.org

The Virtual Campus for Public Health (VCPH) is the learning platform of the Pan American Health Organization (PAHO). The Virtual Campus is designed to be a flexible learning platform for students, health professionals, and health managers, allowing them to build their knowledge and skills in public health and to help them keep up with the latest trends in the field.
